37. Details

SPOKE WITH COMPL. WHO STATED THAT SHE WAS DRIVING N. ON RIVER ROAD NEAR BIRARCHIE AS SHE WAS DRIVING SHE NOTICED A LARGE ORANGE CIRCULAR OBJECT ^{IN THE SKY} TRAVELING IN A NORTHEASTERLY DIRECTION. SHE STOPPED ^{THE} CAR ROLLED DOWN THE CAR WINDOW AND HEARD A WHISTLING SOUND. THE OBJECT AT THIS POINT WAS HOVERING APPROXIMATELY 200 FT IN THE AIR. THE OBJECT THEN STARTED MOVING IN A NORTHEAST DIR. AND BEGAN TO CLIMB. COMPL. DROVE HOME AND ONCE MORE SPOTTED THE UFO OVER THE HIGGETT SCHOOL. COMPL. INDICATED THAT THE UFO HOVERED OVER THE SCHOOL FOR APPROXIMATELY TEN (10) MIN. AND THEN LEFT TRAVELING

DATE/TIME

NORTHEAST. BOTH OFFICERS INTERVIEWED OTHER PERSONS WHO GAVE THE SAME ACCOUNT OF THE INCIDENT. STATEMENTS FROM ALL THE PEOPLE WHO CLAIMED TO HAVE SEEN THE UFO ARE ATTACHED TO THIS REPORT.

~~PHOTOS~~ PHOTOS WERE TAKEN BY THE FOLLOWING:

~~██████████~~ W/F/17 of ~~██████████~~ - ~~██████████~~
~~██████████~~ M/W/11 of ~~██████████~~ " " "

EACH PERSON TOOK TWO PHOTOS FROM THE SAME CAMERA. PHOTOS TURNED OVER TO OFFICERS ~~██████████~~ & ~~██████████~~ - UNDEVELOPED

THIS OFFICER ALSO SPOKE WITH - ~~██████████~~ of ~~██████████~~ ~~██████████~~ WHO STATED THAT APPROXIMATELY 8⁰⁵ PM HE AND HIS TWO SONS, ~~██████████~~ W/M/13 & ~~██████████~~ W/M/10 HAD SEEN AN OBJECT WHICH THEY DESCRIBED AS OVAL SHAPED AND APPEARED BURNING ORANGE IN COLOR MOVING IN THE SKY. MR. ~~██████████~~ SAID IT DISAPPEARED AND RE-APPEARED TWO OR THREE TIMES. OBJECT THEN LEFT THE AREA.

OFFICERS TROMBLEY & HAMEL CHECKED AREA UNABLE TO LOCATE ANY OBJECTS. THIS OFFICER (HAMEL) NOTIFIED SALTERIDGE AIRFORCE BASE & THEY STATED THEY ^{WOULD CHECK} ~~BACK WITH~~ THIS STATION

Also clears Complaint Nos.

On Wednesday 3/8/67 19 67
date

At _____ A.M. or 8:30 P.M.

I, [REDACTED]

Address [REDACTED] Phone [REDACTED]

☒ Witnessed ☐ Incident

☐ Was Involved ☐ Accident

BRIARCLIFF +
WEDGEWOOD
Location

[REDACTED]
Intersection or house number

DETAILS: I saw a irredescent large red
ball in the sky. It first of all was
standing still over Liggett School, up in
the sky - but was larger than a star.
Then it started moving to the right
of the school. It circled back to the
left of the school & seemed to come down
about 200-300 ft. above Liggett School (river).
It looked like a airplane that was
crashing. It was only down about 200 ft.
for a minute or two. Then it went
up straight & my brother got the camera
& I took two pictures (which I have turned out).
After we took the picture it seemed to
move right again, flashing brightly & then down.
About 5 min later it was gone.

SIGNATURE [REDACTED]

3-8-67

853-67

Driving north on River Road
with my son Mark I spotted
an object in the sky that
looked like a orange-red
flame. I thought it was an
airplane on fire. I stopped
the car & rolled the windows
down & heard a noise like
a whistling jet sound. It
kept going up & finally
disappeared. We came home
& saw it again over Leggett
School. It stayed there for
about 5 or 10 min. It
disappeared 3 times & then
finally went away.

3-8-67

Driving north on river road

Driving on sycamorewood By Contubary
and saw a redish orange light and it
kept getting closer and bigger it ~~passed~~
over light field about 200 feet up ~~threw~~
then it moved to River Road going
north and the it went farther away
and then went away later on I was
going to my boyfriend's house and saw
it again over light my boyfriend's
pictures of it. Then it went farther away
and come back 2 times

~~XXXXXXXXXXXXXXXXXXXX~~

At one time object appeared to be
on fire as shown below.

"UFO" Reporting Data:

a. DESCRIPTION OF THE OBJECT(S):

(1) Shape Round

(2) Size compared to a known object (use one of the following terms: Head of a pin, pea, dime, nickel, quarter, half dollar, silver dollar, baseball, grapefruit, or basketball) held in the hand at about arm's length.

Size Head of a pin

(3) Color Orange-Red

(4) Number One

(5) Formation, if more than one NA

(6) Any discernible features or details Similar to Mercury-larger!

(7) Tail, trail, or exhaust, including size of same compared to size of object(s) what seemed to be sparks fell earthward for several seconds.

(8) Sound; if heard, describe sound None

(9) Other pertinent or unusual features Appeared similar to publicized visible satellites except for color. Orange-red instead of white!

b. DESCRIPTION OF COURSE OF OBJECT(S):

(1) What first called the attention of observer(s) to the object(s)?

Bright color on horizon.

(2) Angle or elevation and azimuth of object(s) when first observed.

Elevation approx 10° - azimuth approx 40°

(3) Angle or elevation and azimuth of object(s) upon disappearance.

Elevation approx 10° - azimuth approx 220°

(4) Description of flight path and maneuvers of object(s).

Straight line - seemed to be orbital

(5) How did the object(s) disappear? Instantaneously to the North, etc.)?

slowly flickered out.

(6) How long were the objects(s) visible? (Be specific, 5 minutes, 1 hour, etc.)

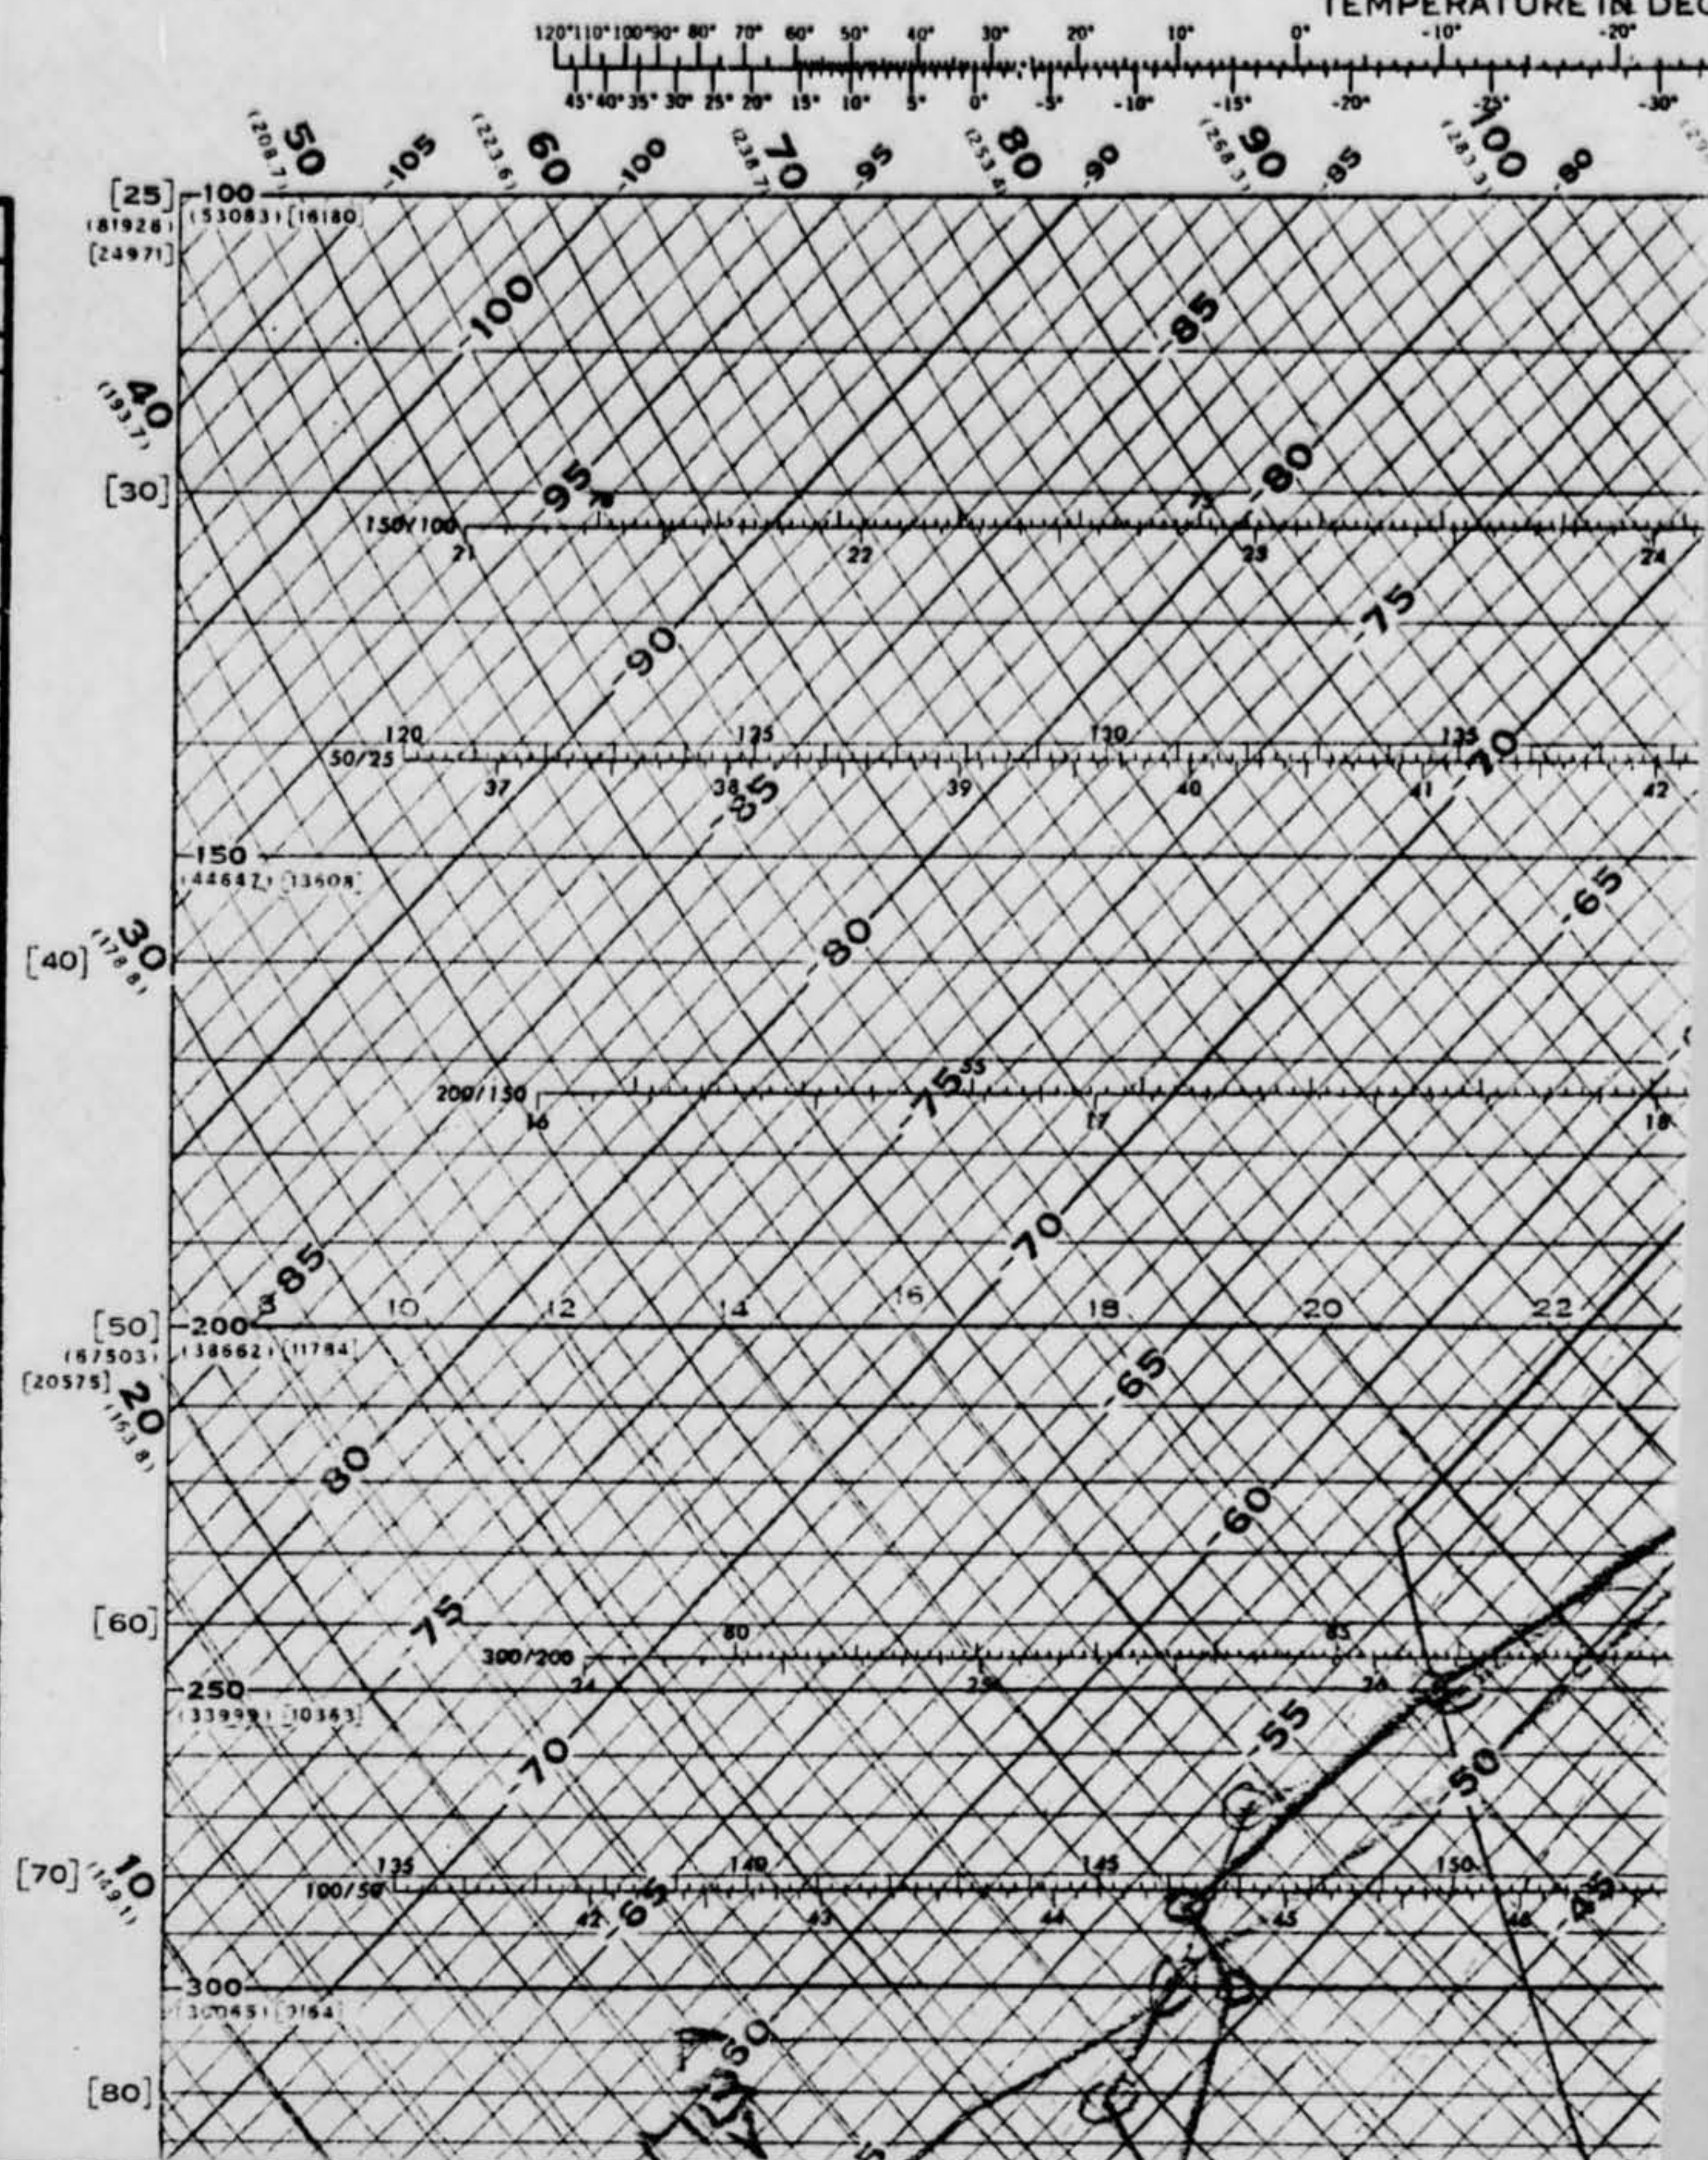

5-10 minutes

EXPLANATION

ISOBARS are straight, horizontal brown lines. The heights of the pressure surfaces in the ICAO Standard atmosphere, below the pressure values on the left, are in parentheses () for values in feet and brackets [] for meter values.

ISOTHERMS (°C) are the straight, equidistant brown lines running diagonally upward from left to right.

DRY ADIABATS are the slightly curved brown lines that intersect the 1000 mb. isobar at intervals of 2°C, and diverge upward from right to left. The Dry Adiabats for the overlap portion of the pressure range are labeled with two values. (See below.)

SATURATION ADIABATS are the curved green lines that intersect the 1000 mb. isobar at intervals of 2°C, diverging upward and trending to become parallel to the dry adiabats.

SATURATION MIXING RATIO (in gms. per kg.) is represented by dashed green lines. The values appear between the 1000 and 900 mb. lines.

THICKNESS (in hundreds of geopotential feet and meters) of the layers 1000/700, 1000/500, 700/500, 500/300, 300/200, 200/100, 100/50, 50/25 mb., is represented by numbers and a graduation along the middle of each layer. The thicknesses are obtained from the vertical temperature curve by the equal-area method, using any straight line as a drawing line.

HEIGHT in geopotential feet in meters above mean sea level, or station level, of the 1000 mb. surface is obtained from the nomogram in the upper left-hand corner by drawing a straight line from the temperature scale (°F) or (°C) through the point P_0 (mean sea level or station pressure) on the pressure scale, and reading height on the appropriate height scale.

ICAO STANDARD ATMOSPHERE SOUNDING is indicated by a thick brown line.

The saturated adiabats and isopleths of saturation mixing ratio are computed by use of vapor pressure over a plane water surface at all temperatures.

Extension of chart to 25 mb. has been accomplished by overlap with pressure indicated in brackets [100] at 800 mb. and [25] at 100 mb. Dry adiabats for the overlap are labeled in parentheses ().

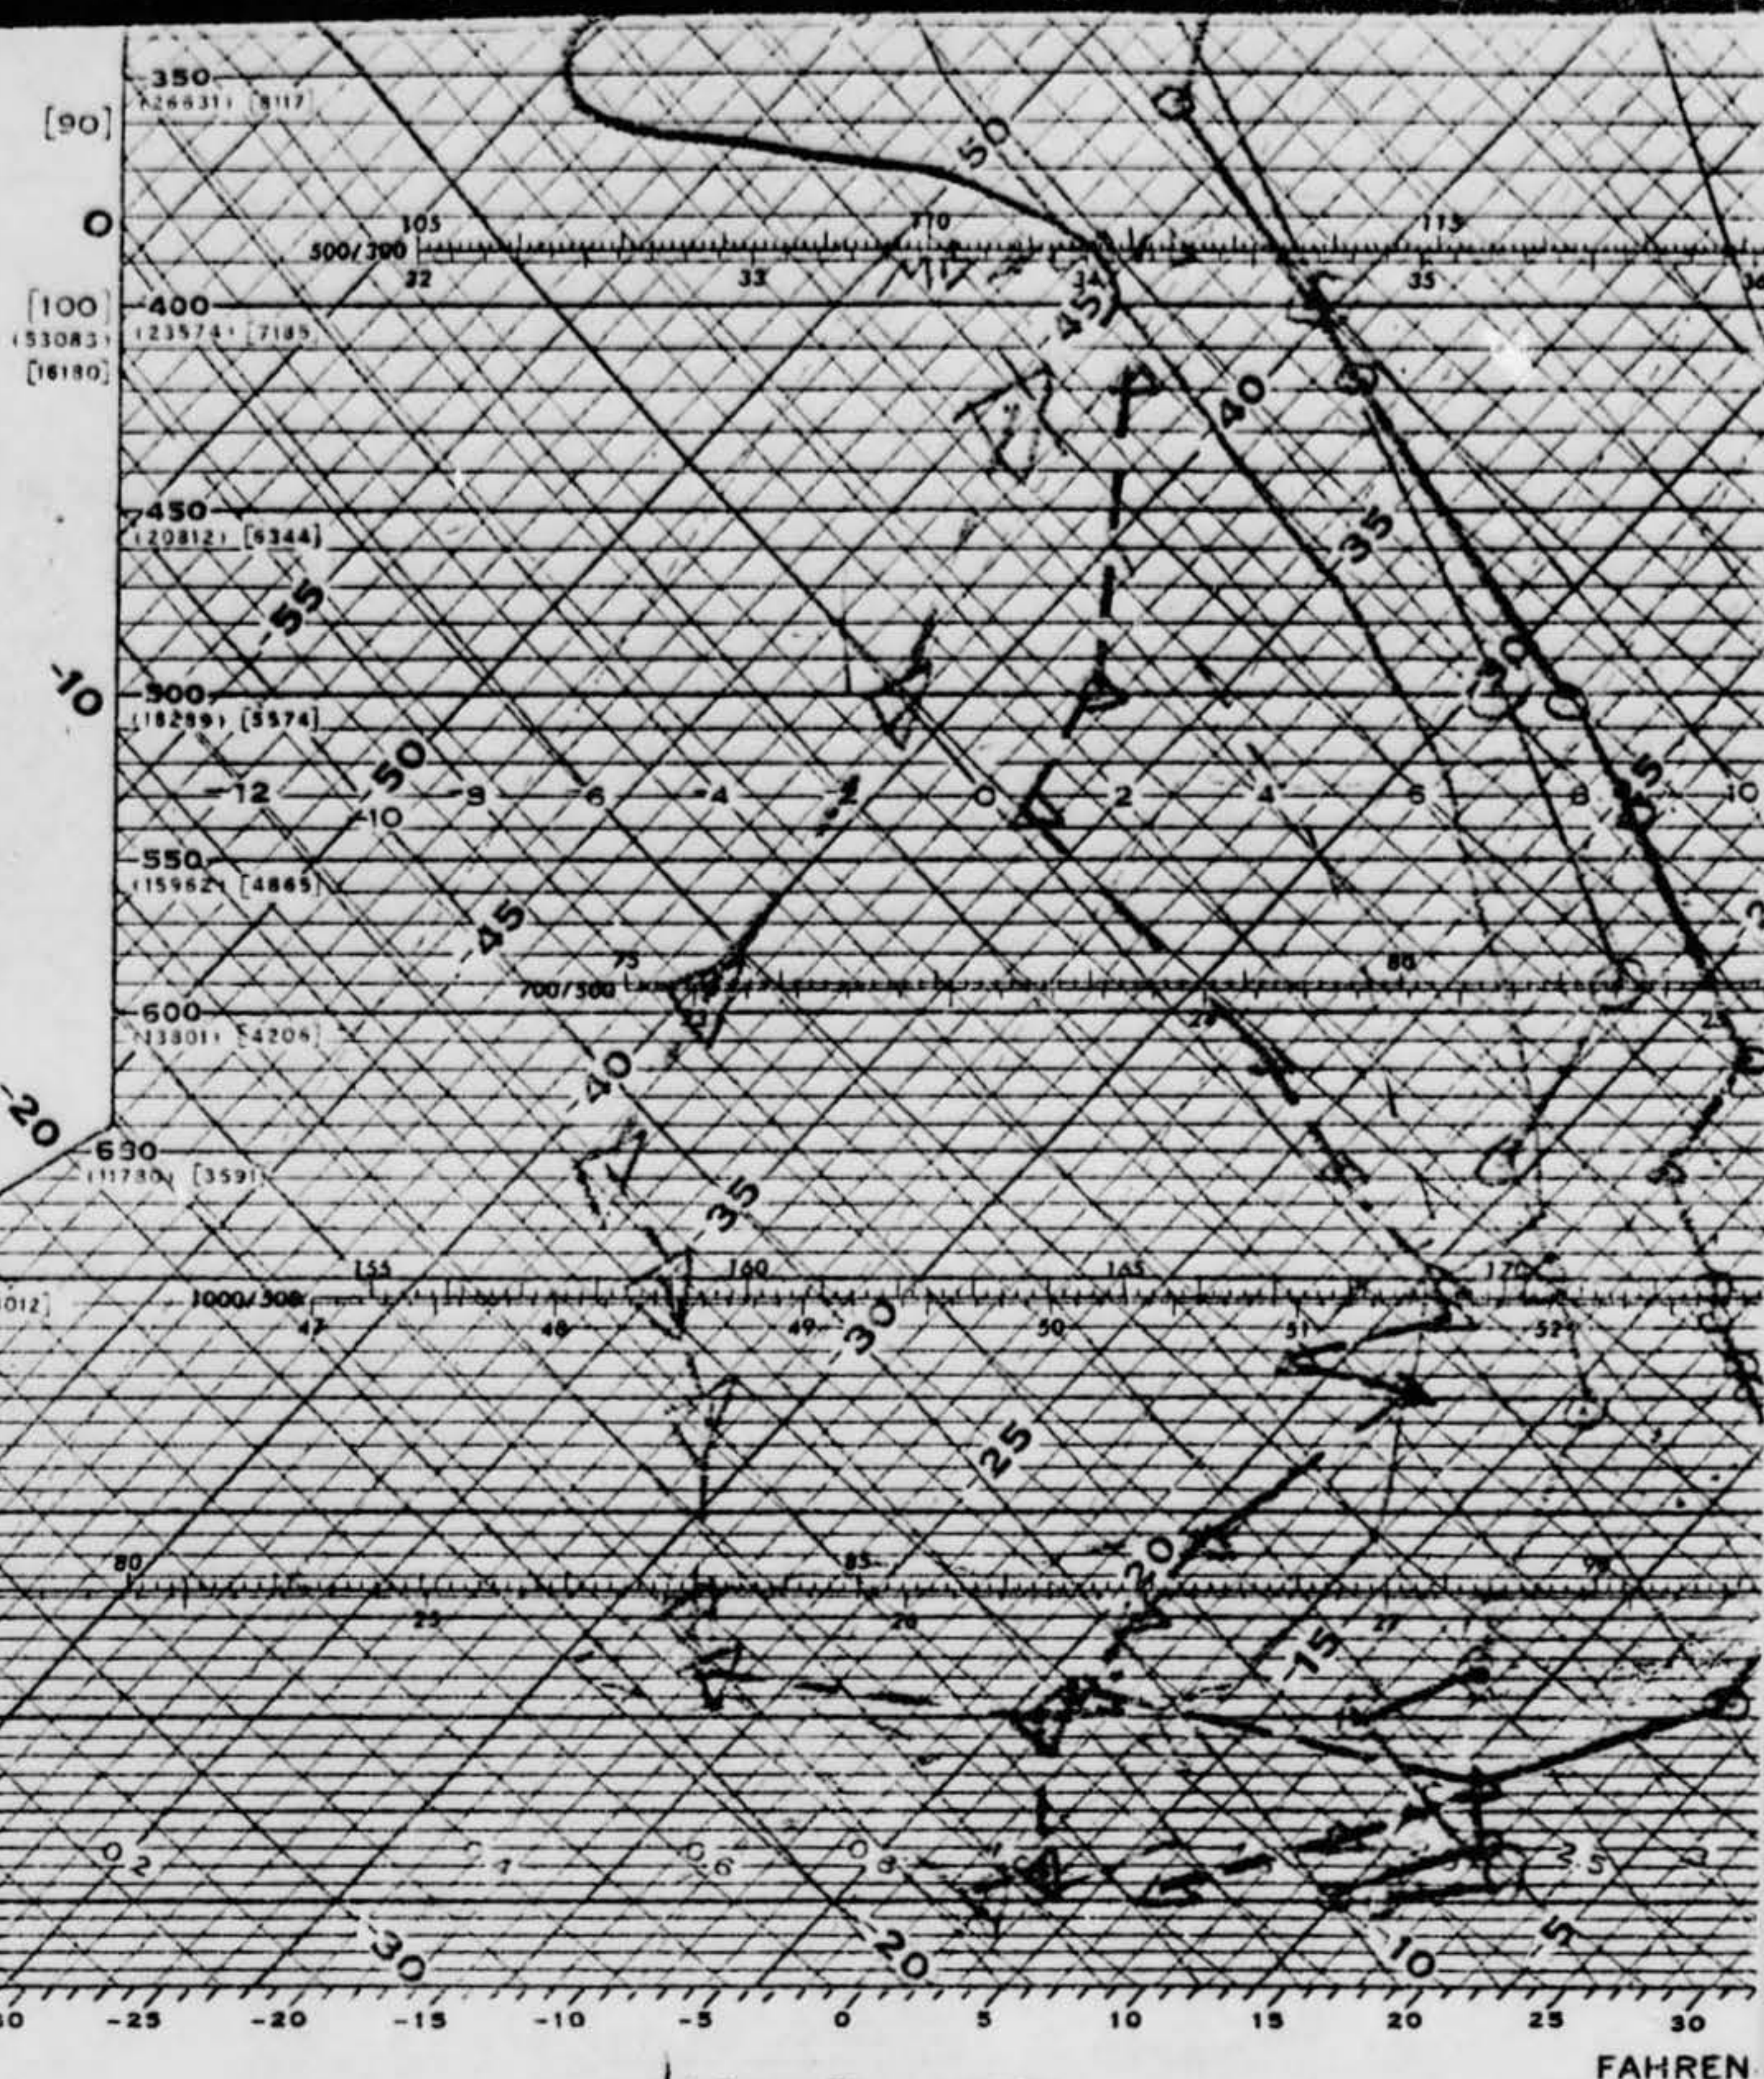

APPROXIMATE VIRTUAL TEMPERATURE may be obtained from the formula $T_v = T + \frac{w}{P}$ where T_v is virtual temperature in °C, T is true air temperature in °C, and w is mixing ratio in grams/gram. For purposes of thickness computation, use the mean temperature of the layer for T and use the mean mixing ratio of the layer for w .

Black dots along wind scale line indicates the levels for which wind data are reported and plotted. The open circles indicate the mandatory pressure levels at which wind data are also entered.

All heights used in this diagram are in geopotential feet and meters.

MEMO FOR THE RECORD:

Spoke with Major Nyls concerning the photographs taken by the [REDACTED]. Major Nyls said that he had the opportunity to view the photographs. The only object that appeared on the photos was a small street light located across the street in the direction of the UFO. Major Nyls said he went to the scene and did see the street light. He definitely believes that the object was not photographed but the street light was.

2-2-2

"UFO" Reporting Data (continued)

c. MANNER OF OBSERVATION:

(1) Use one or any combination of the following items: Ground-visual, air-visual, ground-electronic, air-electronic. (If electronic, specify type of radar.)

Ground-visual

(2) Statement as to optical aids (telescopes, binoculars, etc.) used and description thereof.

None

(3) If the sighting occurred while air-borne, give type of aircraft, identification number, altitude, heading, speed, and home station.

N.A.

d. TIME AND DATE OF SIGHTING:

(1) ~~Time~~ time-date group of sighting 7⁵⁰PM March 5, 1967

(2) Light conditions. (Use one of the following terms: night, day, dawn, dusk.)

Night

e. LOCATION OF OBSERVER(s). Give exact latitude and longitude of each observer, and/or geographical position.

Grosse Pte. Woods, Mich. - Corner of Hint Club Dr. & Jackson

f. IDENTIFYING INFORMATION ON OBSERVER(s):

(1) Civilian - Name, age, mailing address, occupation, and estimate of reliability.

Age 36 - Photo reproduction business owner.
Former ACWS controller - USAF - Japan

(2) Military - Name, grade, organization, duty and estimate of reliability.

ADC-1 Cmbt Spt Gp-CDC
Selfridge AFB, Mich.

PROJECT 10073 RECORD

1. DATE - TIME GROUP 8 Mar 67 9/0150Z	2. LOCATION Grosse Point Woods, Michigan multiple
3. SOURCE Civilian	10. CONCLUSION Balloon(hot air)
4. NUMBER OF OBJECTS One	
5. LENGTH OF OBSERVATION Several minutes	11. BRIEF SUMMARY AND ANALYSIS Observers watched a reddish orange colored light like a fire in the NE portion of the sky. The object was round in shape and gave off a funny sound. At first the observers thought that the object was on fire. The color dimmed and brightened irregularly. The description is consistent with that of a hot air balloon. There has been a rash of hot air balloons reported in early March from the area.
